 - **Murtaza**
-

Project Overview

Future You is an intelligent and interactive web application designed to help students discover their future career path based on their personality, interests, and strengths. It provides quizzes, learning guidance, videos, and downloadable roadmaps — all in a single futuristic and user-friendly platform.

Main Features

👤 User System

- Secure **Login / Register** using PHP and MySQL.
- Session management for personalized user experience.

☐ Career Personality Quiz

- 12 interactive questions with progress tracking.
- Dynamic scoring logic (PHP-based) to suggest careers like Software Engineer, Designer, Teacher, etc.
- Animated progress bar and glowing futuristic UI.

🎯 Career Guidance Hub

- Separate **Guidance Page** where users can explore career paths.
- Includes **videos, articles, and downloadable PDF roadmaps** for multiple fields.
- Covers areas like Technology, Design, Business, and Medicine.

📊 Result Dashboard

- Displays user’s dominant personality type and suggested career.
- Includes placeholder for **Chart.js radar chart** and result summary.

🎓 Recommended Academies Page

- Searchable and filterable list of academies/universities with info cards.
- Helps users find local or online institutions to pursue their chosen field.

📁 Admin Panel

- CRUD system to manage **questions, options, outcomes, and resources**.
- Easy interface to add or edit quiz data and career content.

⚡ Modern Design

- Built using **HTML5, CSS3, JavaScript, jQuery** for front-end.
- **PHP + MySQLi** for backend and database operations.
- Uses **Glassmorphism UI, neon blue glowing effects, and smooth animations** for a professional look.
- Fully **responsive** for desktop and mobile devices.

Technology Stack

Category	Tools / Languages
Frontend	HTML5, CSS3, JavaScript, jQuery
Backend	PHP (MySQLi with Prepared Statements)
Database	MySQL
Design Style	Glassmorphism + Dark Gradient (Blue/Cyan Theme)
Animation	AOS.js / CSS Keyframes
Charting	Chart.js (for results)

Future Enhancements

- Add AI-based quiz evaluation for smarter career predictions.
- Email feature to send user reports as PDF.
- Real-time chat or community section for students to discuss career paths.

Project Goal

To create an **interactive and educational platform** that guides students toward suitable career choices through engaging design, data-driven results, and career resources — all in one system.

Conclusion

Future You isn't just another quiz site — it's a **complete career guidance system** that motivates, informs, and empowers students to shape their future.

With its professional design and innovative features, this project represents the next level of creative web development.
