

# Project Title: Future You Simulator

## Overview

**Future You Simulator** is an interactive web app that predicts a user's future personality and career path based on a fun, choice-based quiz. It also guides students toward real opportunities through motivational content, influencer insights, and recommended institutes — combining self-discovery with career direction.

---

## Main Features

- **User Login & Register** – Secure PHP sessions.
  - **Dynamic Quiz System** – Choice-based questions with branching logic.
  - **Smart Result Engine** – Calculates “Future Profile” using PHP + MySQL.
  - **Future Insights Page** – Personalized results with charts and success index.
  - **Motivation & Learning Hub** – YouTube videos, articles, and influencer profiles.
  - **Recommended Academies & Universities** – List with details, links, and filters.
  - **Admin Dashboard** – Manage questions, outcomes, and content.
  - **Modern UI/UX** – Futuristic teal-blue gradient, glassmorphism style, fully responsive.
- 

## Technologies Used

**Frontend:** HTML5, CSS3, JavaScript, jQuery, Chart.js

**Backend:** PHP (MySQLi)

**Database:** MySQL

**Extras:** Embedded YouTube API, Articles Page, Admin Content Management

---

## Purpose

To help students explore their potential and get real guidance about future careers, motivation, and educational paths — all through an engaging PHP-based web platform.

---

## Duration: 1 Week

1 Setup & Auth   2 Quiz System   3 Result Logic   4 Motivation Hub   5 Academies Page   6 Styling   7 Testing

---

## Conclusion

A creative, futuristic project combining logic, motivation, and education — showing mastery in PHP, MySQLi, JavaScript, and web design.
